<https://github.com/LynnKnapp> | www.linkedin.com/in/lynn-knapp | <http://lynnknappportfolio.surge.sh>

SKILLS

Front End: JavaScript/ES6, React, HTML5, CSS, AJAX/HTTP, Responsive Web Design

Backend: Node.js, Express, Mongoose, MongoDB, MLab

Other Skills: Git, JSON, Written Communication, Problem Solving Skills, Interpersonal Skills, Adaptability, Detail Oriented

WEB DEVELOPMENT WORK

See portfolio for project links

React Seinfeld API Quiz - <http://seinfeldquiz2.surge.sh/>

Github: <https://github.com/LynnKnapp/assignments3/tree/master/projects/seinfeld-project-final-version>

Summary: I built this quiz using react.js. I used a seinfeld API and an axios get request to receive the questions. I also used react-context to receive props from other sister components.

Pawesome Pets Pet Adoption - <http://monthlybudget14.surge.sh/>

Github: https://github.com/LynnKnapp/Pawesome_Pets_Adoption

Summary: This is a full stack group pet adoption app. I built the front end using React.js, axios get request to receive data from MongoDB. The user has a choice to search between cats and dogs then click on the adopt link to fill out a form. There is also a search function to search by breed. Along with the front end, I also built the server and built the dog model and route. I then styled the app using CSS.

Monthly Budget App - <https://pawesome-pets1.herokuapp.com/>

Github: https://github.com/LynnKnapp/Pawesome_Pets_Adoption

Summary: This is a front end budget app I built using react.js. I also used react hooks which makes for much cleaner and leaner code, along with JSON and incorporated react icons to the styling.

Education

V School / Salt Lake City, Utah

August 2019 - November 2019

Full-Stack Javascript Web Development - Certificate

Alpena Community College / Alpena, Michigan

August 1992 - May 1995 - November 2
